

(EU) PPWR 2025/40 Comment

17.04.2026

Dear valued customer,

The PPWR 2025/40 defines the tasks and roles involved in issuing declarations of conformity. As a manufacturer within the meaning of the PPWR, we are responsible for issuing the declarations of conformity for the packaging we place on the market.

The conformity assessment is based on technical documentation. We retain this documentation in accordance with legal requirements and make it available to the relevant authorities upon request.

As our customer, you can rely on these declarations of conformity and are not responsible for creating a database of drawings and FMDs, provided the packaging is used unchanged.

As part of the regulatory milestones, a conformity assessment and the issuance of corresponding declarations are planned from August 12, 2026. Further milestones will be defined in the future through subsequent legal acts of the EU Commission.

By the end of July, we will publish a declaration of conformity for the legally binding requirements (in particular Articles 3, 5, and 7) as a download on our website and will also include a corresponding Certificate of Conformity (CoC) for our packaging on our delivery notes.
